Re: COMPANY PROFILE.

CTS (Concrete Testing Services) was established in 1982 to provide specialized testing and quality control services in concrete to the construction industry.

CTS is a SANAS Mechanical and Physical accredited test facility. This was achieved in 1989 making us, at 33 years the oldest accredited laboratory. A copy of our accreditation certificate together with the schedule of accredited tests can be found on <https://www.sanas.co.za/Certificate%20Published/T0808-05-2022.pdf>

CTS has provided services to many small and larger projects which includes several of the Gautrain stations, Soccer City, Heinken Brewery, DSV Distribution Centre, Mall of Africa, Redstone CSP and others. We also providing a service to "The Leonardo" the tallest building in South Africa at 55 floors in Sandton.

Of specific interest to you may be that we have worked in Lesotho before provided an on-site laboratory service to Millennium 2000 with Trencon also provided various other laboratory services for LSP, SCLC JV and WBHO and are familiar with the conditions in the area.

We trust that the above gives you some insight as to who we are and the services we offer. We would also welcome a visit to our premises in Johannesburg where we could show in more detail our capabilities.

We trust that should you require any further information you will not hesitate to contact us.

Opinions and interpretations expressed herein are outside the scope of SANAS accreditation.
